

Thomas Klausholm Kent

CURRICULUM VITAE

PERSONAL DETAILS

PREFERRED NAME:	Tom	EMAIL:	tkent198@gmail.com
DATE OF BIRTH:	17 July 1989	PHONE:	+45 20 65 47 49
NATIONALITY:	British	LINKEDIN:	tom-kent-5101

PROFILE

Quantitative researcher / data scientist with a background in applied mathematics, statistics, and meteorology. From ideas and research to production-ready code, with a recent focus on data and forecasting systems for renewable energy generation and electricity demand. Driven by curiosity, creativity, and flexibility to both pose and solve technical challenges in diverse, complex, and multi-disciplinary domains. Experienced in modelling (theory and computation), Python development, and knowledge dissemination, across practical applications where the physical and natural environment meets society.

CORE EXPERTISE

- Mathematical, statistical, and machine learning methods, including deterministic and probabilistic forecasting, with a thorough grounding in both theory and computation.
- Modelling and forecasting of renewable generation, electricity demand, weather-driven energy systems, and related economic (cashflow) scenarios. Physical power markets, Power Purchase Agreements, and balancing services in Denmark and Germany.
- Production-ready data science (Python): data and forecasting services, model development and calibration, front-end apps and dashboards, databases, APIs, monitoring and alerting of critical operations.
- Working with diverse real-world datasets, including time series, gridded weather data, and operational (real-time) data that require filtering and validation.
- Excellent communication of complex ideas and concepts to both technical and non-technical audiences; native English speaker, comfortable in Danish (written and verbal).
- Project delivery, planning and prioritisation, stakeholder engagement, leadership, and fostering an inclusive and productive working environment.

TECHNOLOGY

Python	Typical package stack: numpy, scipy, pandas, xarray, scikit-learn / lightgbm / xgboost. Viz: matplotlib, plotly, streamlit. Venv: uv.
Data & storage	SQL, GraphQL, Azure Blob, APIs, time-series/tabular and gridded (weather and earth system) datasets.
Engineering	GitHub/Lab for version control, development, and CI/CD pipelines.
Cloud & ops	Azure; Grafana for monitoring and operational alerting.
Other	linux/WSL, coding agents (codex, claude), Matlab, R.

PROFESSIONAL EMPLOYMENT

AUG. 2026 - PRESENT	Data Scientist DLG Group, Fredericia, Denmark
DEC. 2024 - JULY 2026	Lead Quantitative Researcher Norlys Energy Trading A/S, Aalborg, Denmark Tech Lead for forecasting, with formal responsibility for prioritisation, project delivery, and stakeholder management. Combining technical expertise, domain knowledge, and commercial understanding for effective cross-team co-ordination and implementation of critical data and forecasting services.
FEB. 2022 - DEC. 2024	Quantitative Researcher Norlys Energy Trading A/S, Aalborg, Denmark Modelling, analytics, and commercial applications for renewable energy and power markets in DK and DE. • Designed and implemented operational forecasting services for renewable generation and demand (from days ahead to imbalance/real-time) • Co-developed a package to fetch, process, quality-assure, and visualise diverse real-time data streams from operational asset portfolios. • Designed and co-developed an automated forecast evaluation framework for performance monitoring and reporting. • Established pricing capabilities for PPA-related applications from scratch, including cashflow modelling and leveraging gridded weather data for flexible and scalable solutions. • Implemented front-end tools and dashboards to improve transparency and facilitate decision-making around critical data and forecast performance. • Set up and managed the department's Confluence space for project documentation, knowledge sharing, and transparency across the business.
2021	Career break: downtime, travelling, and move to DK.
JAN. 2018 - DEC. 2020	Postdoctoral Research and Teaching Fellow Dept. of Applied Mathematics, University of Leeds, UK Research and teaching in applied maths, with a focus on flood modelling and mitigation, and public engagement and communication.
H2 2017	Career break: travelling in the UK, Europe, and New Zealand.
JAN. - MAY 2017	Postdoctoral Research Associate Dept. of Applied Mathematics, University of Leeds, UK Impact Accelerator Award to facilitate the transfer of knowledge and associated software from research with the Met Office.
MAY 2013- DEC. 2016	Postgraduate Researcher & Teaching Assistant Dept. of Applied Mathematics, University of Leeds, and the Met Office, UK PhD research in geophysical fluid dynamics and data assimilation.
JAN. - APRIL 2013	Freelance Content Writer Research Media (Applied health and environmental research)
SEPT. - DEC. 2012	Visiting Research Scientist GEOMAR Helmholtz Centre for Ocean Research, Kiel, Germany

EDUCATION

MAY 2013 - DEC. 2016	PhD Applied Mathematics University of Leeds, UK
SEPT. 2011 - SEPT. 2012	MSc Meteorology and Climatology (DISTINCTION) University of Birmingham, UK
AUG. 2009 - AUG. 2010	Exchange Year (Erasmus Program) Technical University of Dresden, Germany
SEPT. 2007 - JULY 2011	BSc Mathematics (FIRST CLASS (HONS)) University of Bristol, UK

SELECTED ACADEMIC OUTPUTS

- **Publications:** 5 peer-reviewed journal publications spanning data assimilation, flood modelling, hydrology, and meteorology, plus several preprints, technical reports, and public-facing blogs for research dissemination.
- **Talks and seminars:** invited seminars at the Met Office, University of Reading, Freie Universität Berlin, Universität Potsdam, and Leeds Institute for Fluid Dynamics; conference talks in the UK, Europe, and the USA.
- **Teaching:** tutorials, workshops, assessment, lectures, and module management across undergraduate applied mathematics courses at the University of Leeds.
- **Awards and funding:** successful (and unsuccessful) proposals for research funding, visits, attending and hosting conferences.

Full academic output available online via tkent198.github.io.

LANGUAGES

ENGLISH:	Native speaker
DANISH:	Proficient (Prøve i Dansk 3 with average grade 11.5)
GERMAN:	Proficient (CEFR: C1, A Level: A)
FRENCH:	Intermediate
SPANISH:	Elementary

PERSONAL INTERESTS

In my spare time I enjoy all things football-related, travelling, time with family and friends, trips to the pub, spending time outdoors, cooking and growing food.
